MEMORANDUM TO: Chairman, EDIC
FROM : Executive Secretary, EDIC
SUBJECT : Requested EDIC Study of Polish Civilian Requirements
for Selected Strategic Commodities

The attached list of commodities, currently under embargo or quantitative controls to the Sino-Soviet Bloc, is submitted as an illustration of the proposed scope and content of the requested EDIC study of Polish civilian requirements for selected strategic commodities. No claim is made that this list is exhaustive, nor that all items now contained therein would merit retention in the light of further study. Items are currently included because they are of importance to the civilian economy of Poland, and because indigenous production, if any, is insufficient to meet the legitimate civilian requirement.
